

Kenneth Bushman | Full Stack Web Developer

Fairfax, CA | 415-302-0660 | kenny@k2sites.com | [Github](#) | [LinkedIn](#)

Skills

Languages - HTML5, CSS3, JavaScript, jQuery, Node.js, Ruby, PHP, Markdown

Frameworks - Angular, React, Express, Rails, Handlebars, Bootstrap, EJS, Skeleton

Databases - MySQL, PostgreSQL, SQL Lite, Mongo DB

Other - AJAX, JSON, Git, Sublime Text, Google Analytics, Photoshop, Illustrator, DreamWeaver

Experience

General Assembly Web Development Immersive Student | San Francisco | Sept - Nov 2016

- Developed full-stack responsive web apps, overseeing all stages of development from conception and wire framing to back-end and front-end execution.

Projects:

- **My Movies API App** gives users the ability to add new movies, list the details, and add user stories. Technologies: MongooseDB, Express, NodeJS, JavaScript, JQuery, Angular, HTML, CSS
- **Web Development Project Management App** gives users the ability to add clients, list project details, and add user stories. Technologies: MongooseDB, Express, NodeJS, JavaScript, JQuery, Handlebars, Bootstrap, HTML, CSS (*working on version 2 with Angular)
- **FridgeArt** allows users to organize and share their child's art work. I managed all aspects of this project from concept and wireframes, to development and deployment. Technologies: Ruby, Rails, Bcrypt, Paperclip, ImageMagick, HTML, CSS
- **Band Wagon** is a Ruby on Rails CRUD application built in 3 days with a team of 4 developers. Band Wagon allows bands to advertise openings and connect with musicians. I collaborated to develop requirements and a project roadmap as well as individually contributed Ruby code for models, controllers and routes. I also took on the responsibility of creating the wireframes, and HTML/CSS for a fully responsive front end. Technologies: Ruby, Rails, Paperclip, ImageMagick, Bcrypt, PostgreSQL, HTML/CSS, Bootstrap

K2 Sites | Front End Web Developer | Nov 2011 – Present

- Developed responsive, mobile-ready websites using HTML5, CSS3, PHP, JavaScript, and JQuery
- Created custom forms for surveys, quizzes, contact forms, and integration with email marketing services
- Worked closely with graphic designers, marketing departments, and clients
- Managed domain registrations and transfers, DNS settings, Cpanel configurations, FTP and email account setup, and backups
- Developed custom HTML newsletter templates
- WordPress theme development and troubleshooting
- JavaScript plugin development and troubleshooting (3rd party vendors)
- Consistently received client appreciation for responsiveness, clear communication, and meticulous attention to detail

Digidesign (now Avid Audio) | Tech Support Rep | 2007 - 2009

- Support Lead for 002 and 003 product line: Collaborated with Testing, Engineering & Tech Pubs teams during development, learning all facets of the device in order to help create the most user-friendly product possible

Esalen Institute | Customer Service Manager | 2003 - 2006

- Coordinated activities in a fast-paced office environment including handling client reservations and needs
- Developed and documented training and operational procedures

Tekniek | Owner and Lead Systems & Network Administrator | 1998 - 2003

- Founded this small systems and network administration consulting company serving a wide spectrum of clientele including Fortune 500 companies in Bay Area, employing up to 8 contractors at any given time
- Provided network design and implementation, systems administration, project management, systems analysis, troubleshooting and training
